JOURNAL OF ELECTROANALYTICAL CHEMISTRY

Subject index

Absorption spectroscopy
Potential-dependent structural changes of underpotentially deposited copper on an iodine-treated platinum surface determined in situ by surface EXAFS and its polarization dependence (Bommarito et al.) 135
Acetonitrile
Role of protons on the electrochemical polymerization of pyrrole from acetonitrile solutions (Otero, Rodríguez) 513
Ac impedance
Characterisation of titanium passivation films by in situ ac impedance measurements and XPS analysis (Fonseca et al.) 173
Activity coefficients
Modification of the Pitzer equations for application to electrolyte + polar non-electrolyte mixtures (Fernández-Mérida et al.) 63
Adaptive grid techniques
Use of dynamically adaptive grid techniques for the solution of electrochemical kinetic equations. Part 4: The adaptive moving-grid solution of one-dimensional fast homogeneous reaction–diffusion problems with extremely thin reaction zones away from the electrodes (Bieniasz) 71
Adsorbed iodine
Potential-dependent structural changes of underpotentially deposited copper on an iodine-treated platinum surface determined in situ by surface EXAFS and its polarization dependence (Bommarito et al.) 135
Adsorption
Investigation of the early stages of H_{ads} and OH_{ads} adsorption on rhodium in alkaline medium. Part I: Approaches from graphical treatments of cyclic voltammograms based on a langmuirian isotherm (Rakotondrainibe et al.) 455
Adsorption of pyrimidine at the mercury|aqueous solution interface (Rueda et al.) 467
The adsorption of carbon oxides on a palladium electrode from acidic solution (Czerwiński) 487
Note on the hydrogen adsorption–desorption voltammogram on Pt(111) in sulfuric acid solution (Nishihara, Nozoye) 527
Adsorption competition
Isopotential point: A singularity in the voltammetric behaviour of platinum metal electrodes characterising adsorption competition (Wasberg) 541
Alkaline phosphatase
Determination of alkaline phosphatase using a Nafion®-modified electrode (Le Gal La Salle et al.) 281
Anion adsorption
A molecular model for anion adsorption at the electrode|electrolyte interface: a classical approach (Lamperski) 445
Anodic oxidation
Studies of the effect of bismuth on the anodic oxidation of lead in sulphuric acid solution by photocurrent spectroscopy (Xia, Zhou) 423
Cathodic electrosynthesis of metal sulphide thin films at a sulphur-modified gold surface: application to the iron sulphide system (De Tacconi et al.) 545
Anodization
Electrochemical behaviour of a Pb electrode under galvanostatic and potentiostatic conditions in hot alkaline solution (Veluchamy et al.) 253
APS analysis
Characterisation of titanium passivation films by in situ ac impedance measurements and XPS analysis (Fonseca et al.) 173
Aromatic halides
The effect of cathode composition on the efficiency of electrocarboxylation of aromatic halides (Scortichini, Babinec) 111
Aromatic hydrocarbons
Electrochemical polymerization of aromatic hydrocarbons on an ITO electrode using a composite electrolyte of aluminum chloride and copper(I) chloride (Hara, Toshima) 181
Aromatic nitro compounds
The reduction mechanism of aromatic nitro compounds in aqueous medium. Part V. The reduction of nitrosobenzene between pH 0.4 and 13 (Laviron et al.) 427

Bilayer
Electroactive bilayers employing conducting polymers: Part 5, Electrochemical quartz crystal microbalance studies of the overall switching process (Hillman, Glidle) 365
Biological systems
Chemically modified electrode for the selective and sensitive determination of nitric oxide (NO) in vitro and in biological systems (Pariente et al.) 191
Bismuth
Studies of the effect of bismuth on the anodic oxidation of lead in sulphuric acid solution by photocurrent spectroscopy (Xia, Zhou) 423
Bis(terpyridine)cobalt
Electrochemistry of C_{60} films in the presence of bis(terpyridine)cobalt complex (Oyama et al.) 523

Carbon black
Oxygen reduction in acid media: effect of heat treatment on the activity of Co naphthalocyanine (2,3) isomer impregnations on carbon black and the life test comparison with the (1,2) analogue isomer mixture (Biloul et al.) 321
Carbon disk microelectrode
Separate monitoring of reaction products formed at oxidation and reduction sites of TiO_2 photocatalysts using a microelectrode (Sakai et al.) 199
Carbon fiber electrodes
Fabrication of silica-coated carbon fiber ultramicroelectrodes by chemical vapor deposition (Zhao et al.) 505

Carbon fibre microelectrode
Electrocatalytic properties of mixed-valence molybdenum oxide thin film modified microelectrodes (Baoxing, Shaojun) 207
Carbon oxides
The adsorption of carbon oxides on a palladium electrode from acidic solution (Czerwiński) 487
Cathode composition
The effect of cathode composition on the efficiency of electrocarboxylation of aromatic halides (Scortichini, Babinec) 111
Cathodic co-reduction
Cathodic electrosynthesis of metal sulphide thin films at a sulphur-modified gold surface: application to the iron sulphide system (De Tacconi et al.) 545
Cathodic reduction
Cathodic electrosynthesis of metal sulphide thin films at a sulphur-modified gold surface: application to the iron sulphide system (De Tacconi et al.) 545
Chelates
Multisweep cyclic voltammetric studies on the effect of charge on diffusion and sorption processes of ML_3^{n+} chelates at clay-modified electrodes (Fitch, Krzysik) 129
Chemically modified electrode
Chemically modified electrode for the selective and sensitive determination of nitric oxide (NO) in vitro and in biological systems (Pariente et al.) 191
Chemically modified electrodes
Kinetic Ising model for redox hopping of electrons and Saveant's equation (Bosco) 509
Chemical vapor deposition
Fabrication of silica-coated carbon fiber ultramicroelectrodes by chemical vapor deposition (Zhao et al.) 505
Clay-modified electrodes
Multisweep cyclic voltammetric studies on the effect of charge on diffusion and sorption processes of ML_3^{n+} chelates at clay-modified electrodes (Fitch, Krzysik) 129
ClO_4^-
Surface-enhanced Raman spectroscopic studies on structural dynamics of coadsorption of thiourea and ClO_4^- at Ag electrodes (Tian et al.) 271
CO_2
Electroreduction of CO_2 to C_2 and C_3 compounds on Bis(4,5-dihydroxybenzene-1,3-disulphonato)ferrate(II)-fixed polyaniline | Prussian Blue-modified electrode in aqueous solutions (Ogura et al.) 373
Coadsorption
Surface-enhanced Raman spectroscopic studies on structural dynamics of coadsorption of thiourea and ClO_4^- at Ag electrodes (Tian et al.) 271
Coadsorption structure
Structures of copper and halides on Pt(111), Pt(100) and Au(111) electrode surfaces studied by in-situ scanning tunneling microscopy (Matsumoto et al.) 223
Cobalt phthalocyanine
Mechanism of oxygen electroreduction at polypyrrole electrodes modified by cobalt phthalocyanine (Coutanceau et al.) 389
$Co(bpy)_3^{n+}$
Multisweep cyclic voltammetric studies on the effect of charge on diffusion and sorption processes of ML_3^{n+} chelates at clay-modified electrodes (Fitch, Krzysik) 129
Composite electrode voltammetry
Voltammetric determination of optimal conductive load proportion in graphite–epoxy composite electrodes (Navarro-Laboulais et al.) 159
Conducting polymer
Electroactive bilayers employing conducting polymers: Part 5, Electrochemical quartz crystal microbalance studies of the overall switching process (Hillman, Glidle) 365
Conductivity
Electrochemical in situ conductivity measurement of C_{60} films in acetonitrile containing $M(bpy)_3^{2+}$ (M = Fe, Ni, Ru, or Os) (Nishizawa et al.) 233
Copper
Potential-dependent structural changes of underpotentially deposited copper on an iodine-treated platinum surface determined in situ by surface EXAFS and its polarization dependence (Bommarito et al.) 135
Structures of copper and halides on Pt(111), Pt(100) and Au(111) electrode surfaces studied by in-situ scanning tunneling microscopy (Matsumoto et al.) 223
$Cr(bpy)_3^{3+}$
Multisweep cyclic voltammetric studies on the effect of charge on diffusion and sorption processes of ML_3^{n+} chelates at clay-modified electrodes (Fitch, Krzysik) 129
CSV
Cathodic stripping voltammetry of Cu_2Se at mercury electrodes (Mattsson et al.) 49
Current
The current near the edge of a microelectrode for steady state EC′ reactions (Tutty) 519
Cu_2Se
Cathodic stripping voltammetry of Cu_2Se at mercury electrodes (Mattsson et al.) 49
Cyclic voltammetry
Electrochemical study of iridium oxide layers in anhydrous propylene carbonate by cyclic voltammetry and "mirage effect" analysis (Petit, Plichon) 165
Influence of the ohmic polarization effect on thin-layer spectroelectrochemistry (Chen et al.) 239
Linear sweep and cyclic voltammetry for metal deposition at solid and mercury microelectrodes from solutions with and without supporting electrolyte (Daniele et al.) 261
Direct survey of redox active compounds in sesame oil by cyclic voltammetry—studies on sesaminol, sesamol and hydroxyhydroquinone in nujol (Shiragami et al.) 315
Investigation of the early stages of H_{ads} and OH_{ads} adsorption on rhodium in alkaline medium. Part I: Approaches from graphical treatments of cyclic voltammograms based on a langmuirian isotherm (Rakotondrainibe et al.) 455

Desorption
Note on the hydrogen adsorption–desorption voltammogram on Pt(111) in sulfuric acid solution (Nishihara, Nozoye) 527
Deuterium uptake
Deuterium uptake during Pd–D codeposition (Szpak et al.) 121
1,2-Dichloroethane interface
Erythromycin transfer across the water | 1,2-dichloroethane interface modified by a phospholipid monolayer (Yudi et al.) 151
Dihydroxybenzenes
Electropolymerization of 2-hydroxy-3-aminophenazine (HAPh): properties of pHAPh films and kinetics of oxidation and incorporation of dihydroxybenzenes at Pt/pHAPh electrodes (Kokkinidis et al.) 379

EC′ reactions
The current near the edge of a microelectrode for steady state EC′ reactions (Tutty) 519

Electrical percolation
Voltammetric determination of optimal conductive load proportion in graphite–epoxy composite electrodes (Navarro-Laboulais et al.) 159
Electrocarboxylation
The effect of cathode composition on the efficiency of electrocarboxylation of aromatic halides (Scortichini, Babinec) 111
Electrocatalysis
Electrocatalytic properties of mixed-valence molybdenum oxide thin film modified microelectrodes (Baoxing, Shaojun) 207
Study of the electrocatalytic influence of Pt/Ru and Ru on the oxidation of residues of small organic molecules (Krausa, Vielstich) 307
In-situ FTIR study of the electrocatalytic oxidation of ethanol at iridium and rhodium electrodes (De Tacconi et al.) 329
Electroreduction of CO_2 to C_2 and C_3 compounds on Bis(4,5-dihydroxybenzene-1,3-disulphonato)ferrate(II)-fixed polyaniline | Prussian Blue-modified electrode in aqueous solutions (Ogura et al.) 373
Electrochemical assay
Determination of alkaline phosphatase using a Nafion®-modified electrode (Le Gal La Salle et al.) 281
Electrochemical kinetic equations
Use of dynamically adaptive grid techniques for the solution of electrochemical kinetic equations. Part 4: The adaptive moving-grid solution of one-dimensional fast homogeneous reaction–diffusion problems with extremely thin reaction zones away from the electrodes (Bieniasz) 71
Electrochemically oriented surfaces
Observations on electrochemically oriented platinum surfaces (El-Shafei et al.) 247
Electrochemical polymerization
Electrochemical polymerization of aromatic hydrocarbons on an ITO electrode using a composite electrolyte of aluminum chloride and copper(I) chloride (Hara, Toshima) 181
Role of protons on the electrochemical polymerization of pyrrole from acetonitrile solutions (Otero, Rodríguez) 513
Electrochemical quartz crystal microbalance
Electroactive bilayers employing conducting polymers: Part 5, Electrochemical quartz crystal microbalance studies of the overall switching process (Hillman, Glidle) 365
Electrode | electrolyte interface
A molecular model for anion adsorption at the electrode | electrolyte interface: a classical approach (Lamperski) 445
Electrode modification
Electrocatalytic properties of mixed-valence molybdenum oxide thin film modified microelectrodes (Baoxing, Shaojun) 207
Electrode surfaces
Kinetic theory of phase transitions at electrode surfaces: the voltammogram (Blum et al.) 35
Electrolyte + polar non-electrolyte mixtures
Modification of the Pitzer equations for application to electrolyte + polar non-electrolyte mixtures (Fernández-Mérida et al.) 63
Electromigration
Effects of electromigration on polarization curves for parallel electrode reactions in the absence of supporting electrolyte (Kharkats et al.) 43
Electropolymerization
Electropolymerization of 2-hydroxy-3-aminophenazine (HAPh): properties of pHAPh films and kinetics of oxidation and incorporation of dihydroxybenzenes at Pt/pHAPh electrodes (Kokkinidis et al.) 379
Studies of the formation and redox transformation of poly(*o*-phenylenediamine) films using a quartz crystal microbalance (Martinusz et al.) 437
Electroreduction
Electroreduction of CO_2 to C_2 and C_3 compounds on Bis(4,5-dihydroxybenzene-1,3-disulphonato)ferrate(II)-fixed polyaniline | Prussian Blue-modified electrode in aqueous solutions (Ogura et al.) 373
Electroreflection spectroscopy
Effect of axial ligands on the spectroelectrochemical properties of zinc phthalocyanine films. In situ Raman and electroreflection spectra (Palys et al.) 89
Electrosynthesis
Synthesis of flavone-7-O-glucoside by an electrochemical method (Sulochana, Nagarajan) 517
Equivalent circuit
Analysis of electrical equivalent circuit of quartz crystal resonator loaded with viscous conductive liquids (Shana et al.) 21
Erythromycin transfer
Erythromycin transfer across the water | 1,2-dichloroethane interface modified by a phospholipid monolayer (Yudi et al.) 151
Ethanol
In-situ FTIR study of the electrocatalytic oxidation of ethanol at iridium and rhodium electrodes (De Tacconi et al.) 329
Exchange current density
Determination of the exchange current density of the $Li^+ + e^- \rightleftharpoons$ Li reaction in polymer electrolytes by galvanostatic linear polarization of symmetrical cells (Munichandraiah et al.) 495

Flavone-7-O-glucoside
Synthesis of flavone-7-O-glucoside by an electrochemical method (Sulochana, Nagarajan) 517
Flow cell
A renewable glucose sensor fabricated from microemulsion polymerization of thiophene in a flow cell with application in a high-performance liquid chromatography system (Chan et al.) 293
FTIR spectroscopy
In-situ FTIR study of the electrocatalytic oxidation of ethanol at iridium and rhodium electrodes (De Tacconi et al.) 329
Fullerene
Electrochemistry of C_{60} films in the presence of bis(terpyridine)cobalt complex (Oyama et al.) 523
Fullerene films
Electrochemical in situ conductivity measurement of C_{60} films in acetonitrile containing $M(bpy)_3^{2+}$ (M = Fe, Ni, Ru, or Os) (Nishizawa et al.) 233

Galvanostatic
Electrochemical behaviour of a Pb electrode under galvanostatic and potentiostatic conditions in hot alkaline solution (Veluchamy et al.) 253
Galvanostatic linear polarization
Determination of the exchange current density of the $Li^+ + e^- \rightleftharpoons$ Li reaction in polymer electrolytes by galvanostatic linear polarization of symmetrical cells (Munichandraiah et al.) 495
Galvanostatic perturbation
Deuterium uptake during Pd–D codeposition (Szpak et al.) 121
Glucose sensor
A renewable glucose sensor fabricated from microemulsion polymerization of thiophene in a flow cell with application in a high-performance liquid chromatography system (Chan et al.) 293
Gold
Structures of copper and halides on Pt(111), Pt(100) and Au(111) electrode surfaces studied by in-situ scanning tunneling microscopy (Matsumoto et al.) 223

Gold electrodes
Kinetics of the oxygen electrode reaction in molten Li + Na carbonate eutectic. Part 7. Effect of CO_2 partial pressure on the linear scan voltammetric response for the reduction process at gold electrodes (Tomczyk) 353
Graphite–epoxy electrodes
Voltammetric determination of optimal conductive load proportion in graphite–epoxy composite electrodes (Navarro-Laboulais et al.) 159

Halides
Structures of copper and halides on Pt(111), Pt(100) and Au(111) electrode surfaces studied by in-situ scanning tunneling microscopy (Matsumoto et al.) 223
Hg electrode
Cathodic stripping voltammetry of Cu_2Se at mercury electrodes (Mattsson et al.) 49
High-performance liquid chromatography
A renewable glucose sensor fabricated from microemulsion polymerization of thiophene in a flow cell with application in a high-performance liquid chromatography system (Chan et al.) 293
Hydrogen adsorption
Isopotential point: A singularity in the voltammetric behaviour of platinum metal electrodes characterising adsorption competition (Wasberg) 541
Hydrogen peroxide
The cathodic reduction of oxygen on uranium dioxide in dilute alkaline aqueous solution (Hocking et al.) 339
Electrocatalytic reduction of hydrogen peroxide by iron–adenosine nucleotide complexes (Zhao et al.) 501
2-Hydroxy-3-aminophenazine
Electropolymerization of 2-hydroxy-3-aminophenazine (HAPh): properties of pHAPh films and kinetics of oxidation and incorporation of dihydroxybenzenes at Pt/pHAPh electrodes (Kokkinidis et al.) 379

Ionic strength
Scanning electrochemical microscope (SECM) study of the relationship between proton concentration and electronic charge as a function of ionic strength during the oxidation of polyaniline (Troise Frank, Denuault) 399
Ionizable groups
Electrochemical adsorption method for the determination of the pK of ionizable groups of lipid membranes (Egorova, Topolev) 479
Iridium
In-situ FTIR study of the electrocatalytic oxidation of ethanol at iridium and rhodium electrodes (De Tacconi et al.) 329
Iridium oxid
Electrochemical study of iridium oxide layers in anhydrous propylene carbonate by cyclic voltammetry and "mirage effect" analysis (Petit, Plichon) 165
Iron-adenosine nucleotide
Electrocatalytic reduction of hydrogen peroxide by iron–adenosine nucleotide complexes (Zhao et al.) 501
Isopotential point
Isopotential point: A singularity in the voltammetric behaviour of platinum metal electrodes characterising adsorption competition (Wasberg) 541
ITO electrode
Electrochemical polymerization of aromatic hydrocarbons on an ITO electrode using a composite electrolyte of aluminum chloride and copper(I) chloride (Hara, Toshima) 181

pK determination
Electrochemical adsorption method for the determination of the pK of ionizable groups of lipid membranes (Egorova, Topolev) 479
Kinetic Ising model
Kinetic Ising model for redox hopping of electrons and Saveant's equation (Bosco) 509
Kinetic model
Kinetic theory of phase transitions at electrode surfaces: the voltammogram (Blum et al.) 35

Langmuir isotherm
Investigation of the early stages of H_{ads} and OH_{ads} adsorption on rhodium in alkaline medium. Part I: Approaches from graphical treatments of cyclic voltammograms based on a langmuirian isotherm (Rakotondrainibe et al.) 455
Laponite clay modified electrodes
Possible analytical application of laponite clay modified electrodes (Labbé et al.) 103
Lead
Studies of the effect of bismuth on the anodic oxidation of lead in sulphuric acid solution by photocurrent spectroscopy (Xia, Zhou) 423
Lead(II)
Formation of the anodic lead(II) oxide film on lead in alkaline solution and its semiconducting properties (Xia, Zhou) 361
Linear sweep voltammetry
Linear sweep and cyclic voltammetry for metal deposition at solid and mercury microelectrodes from solutions with and without supporting electrolyte (Daniele et al.) 261
Linear voltammetry
Kinetics of the oxygen electrode reaction in molten Li + Na carbonate eutectic. Part 7. Effect of CO_2 partial pressure on the linear scan voltammetric response for the reduction process at gold electrodes (Tomczyk) 353
Lipid membranes
Electrochemical adsorption method for the determination of the pK of ionizable groups of lipid membranes (Egorova, Topolev) 479
Lithium
Determination of the exchange current density of the $Li^+ + e^- \rightleftharpoons$ Li reaction in polymer electrolytes by galvanostatic linear polarization of symmetrical cells (Munichandraiah et al.) 495

Mass spectrometry
Study of the electrocatalytic influence of Pt/Ru and Ru on the oxidation of residues of small organic molecules (Krausa, Vielstich) 307
Mercury | aqueous solution interface
Adsorption of pyrimidine at the mercury | aqueous solution interface (Rueda et al.) 467
Mercury microelectrodes
Linear sweep and cyclic voltammetry for metal deposition at solid and mercury microelectrodes from solutions with and without supporting electrolyte (Daniele et al.) 261
Metal deposition
Linear sweep and cyclic voltammetry for metal deposition at solid and mercury microelectrodes from solutions with and without supporting electrolyte (Daniele et al.) 261
Metal sulphides
Cathodic electrosynthesis of metal sulphide thin films at a sulphur-modified gold surface: application to the iron sulphide system (De Tacconi et al.) 545

Methanol oxidation
Study of the electrocatalytic influence of Pt/Ru and Ru on the oxidation of residues of small organic molecules (Krausa, Vielstich) 307
Methylguanidium nitrate
Two-dimensional condensation of methylguanidinium nitrate at the mercury|water interface (Wandlowski et al.) 215
Microelectrode edge
The current near the edge of a microelectrode for steady state EC′ reactions (Tutty) 519
Microemulsion polymerization
A renewable glucose sensor fabricated from microemulsion polymerization of thiophene in a flow cell with application in a high-performance liquid chromatography system (Chan et al.) 293
Mirage effect analysis
Electrochemical study of iridium oxide layers in anhydrous propylene carbonate by cyclic voltammetry and "mirage effect" analysis (Petit, Plichon) 165
Modified Pitzer equations
Modification of the Pitzer equations for application to electrolyte + polar non-electrolyte mixtures (Fernández-Mérida et al.) 63
Molecular model
A molecular model for anion adsorption at the electrode|electrolyte interface: a classical approach (Lamperski) 445
Molten carbonates
Kinetics of the oxygen electrode reaction in molten Li + Na carbonate eutectic. Part 7. Effect of CO_2 partial pressure on the linear scan voltammetric response for the reduction process at gold electrodes (Tomczyk) 353

Nafion®-modified electrode
Determination of alkaline phosphatase using a Nafion®-modified electrode (Le Gal La Salle et al.) 281
Naphthalocyanine
Oxygen reduction in acid media: effect of heat treatment on the activity of Co naphthalocyanine (2,3) isomer impregnations on carbon black and the life test comparison with the (1,2) analogue isomer mixture (Biloul et al.) 321
Native hemoglobin
High resolution imaging of native hemoglobin by scanning tunneling microscopy (Zhang et al.) 535
Neutral solutions
The cathodic reduction of oxygen on uranium dioxide in dilute alkaline aqueous solution (Hocking et al.) 339
Nitric oxide
Chemically modified electrode for the selective and sensitive determination of nitric oxide (NO) in vitro and in biological systems (Pariente et al.) 191
Nitrosobenzene
The reduction mechanism of aromatic nitro compounds in aqueous medium. Part V. The reduction of nitrosobenzene between pH 0.4 and 13 (Laviron et al.) 427

Ohmic polarization effect
Influence of the ohmic polarization effect on thin-layer spectroelectrochemistry (Chen et al.) 239
On-line mass detection
A kinetic approach of competitive photoelectrooxidation of HCOOH and H_2O on TiO_2 anatase thin layers via on-line mass detection (Bogdanoff, Alonso-Vante) 415
Osmotic coefficients
Modification of the Pitzer equations for application to electrolyte + polar non-electrolyte mixtures (Fernández-Mérida et al.) 63

Oxidation
Study of the electrocatalytic influence of Pt/Ru and Ru on the oxidation of residues of small organic molecules (Krausa, Vielstich) 307
In-situ FTIR study of the electrocatalytic oxidation of ethanol at iridium and rhodium electrodes (De Tacconi et al.) 329
Scanning electrochemical microscope (SECM) study of the relationship between proton concentration and electronic charge as a function of ionic strength during the oxidation of polyaniline (Troise Frank, Denuault) 399
Oxide film
Formation of the anodic lead(II) oxide film on lead in alkaline solution and its semiconducting properties (Xia, Zhou) 361
Oxygen electroreduction
Mechanism of oxygen electroreduction at polypyrrole electrodes modified by cobalt phthalocyanine (Coutanceau et al.) 389
Oxygen reduction
Oxygen reduction in acid media: effect of heat treatment on the activity of Co naphthalocyanine (2,3) isomer impregnations on carbon black and the life test comparison with the (1,2) analogue isomer mixture (Biloul et al.) 321
The cathodic reduction of oxygen on uranium dioxide in dilute alkaline aqueous solution (Hocking et al.) 339
Kinetics of the oxygen electrode reaction in molten Li + Na carbonate eutectic. Part 7. Effect of CO_2 partial pressure on the linear scan voltammetric response for the reduction process at gold electrodes (Tomczyk) 353
Oxygen reduction on platinum single-crystal electrodes in acidic solutions (Kita et al.) 407

Palladium electrode
The adsorption of carbon oxides on a palladium electrode from acidic solution (Czerwiński) 487
Pd–D codeposition
Deuterium uptake during Pd–D codeposition (Szpak et al.) 121
Phase transitions
Kinetic theory of phase transitions at electrode surfaces: the voltammogram (Blum et al.) 35
Phospholipid monolayer
Erythromycin transfer across the water|1,2-dichloroethane interface modified by a phospholipid monolayer (Yudi et al.) 151
Photoactive α-PbO
Photoelectrochemical studies of photoactive lead oxide prepared by the "Potential pulse coupled potentiodynamic anodization technique" in alkaline medium (Mukhopadhyay et al.) 531
Photocatalysts
Separate monitoring of reaction products formed at oxidation and reduction sites of TiO_2 photocatalysts using a microelectrode (Sakai et al.) 199
Photocurrent spectroscopy
Studies of the effect of bismuth on the anodic oxidation of lead in sulphuric acid solution by photocurrent spectroscopy (Xia, Zhou) 423
Photoelectrochemical
Photoelectrochemical studies of photoactive lead oxide prepared by the "Potential pulse coupled potentiodynamic anodization technique" in alkaline medium (Mukhopadhyay et al.) 531
Photoelectrooxidation
A kinetic approach of competitive photoelectrooxidation of HCOOH and H_2O on TiO_2 anatase thin layers via on-line mass detection (Bogdanoff, Alonso-Vante) 415
Platinum
Structures of copper and halides on Pt(111), Pt(100) and Au(111) electrode surfaces studied by in-situ scanning tunneling microscopy (Matsumoto et al.) 223

Platinum electrode
Indicator and reference platinum|solid polymer electrolyte electrodes for a simple solid-state amperometric hydrogen sensor (Opekar et al.) 301
Platinum metal electrodes
Isopotential point: A singularity in the voltammetric behaviour of platinum metal electrodes characterising adsorption competition (Wasberg) 541
Platinum single-crystal electrodes
Oxygen reduction on platinum single-crystal electrodes in acidic solutions (Kita et al.) 407
Platinum substrate
Potential-dependent structural changes of underpotentially deposited copper on an iodine-treated platinum surface determined in situ by surface EXAFS and its polarization dependence (Bommarito et al.) 135
Polarization curves
Effects of electromigration on polarization curves for parallel electrode reactions in the absence of supporting electrolyte (Kharkats et al.) 43
Polyaniline
Scanning electrochemical microscope (SECM) study of the relationship between proton concentration and electronic charge as a function of ionic strength during the oxidation of polyaniline (Troise Frank, Denuault) 399
Polymer–conductive-load composite electrodes
Voltammetric determination of optimal conductive load proportion in graphite–epoxy composite electrodes (Navarro-Laboulais et al.) 159
Polymer electrolytes
Determination of the exchange current density of the $Li^+ + e^- \rightleftharpoons$ Li reaction in polymer electrolytes by galvanostatic linear polarization of symmetrical cells (Munichandraiah et al.) 495
Polymer films
Electrochemical polymerization of aromatic hydrocarbons on an ITO electrode using a composite electrolyte of aluminum chloride and copper(I) chloride (Hara, Toshima) 181
Poly(*o*-phenylenediamine) films
Studies of the formation and redox transformation of poly(*o*-phenylenediamine) films using a quartz crystal microbalance (Martinusz et al.) 437
Polypyrrole electrodes
Mechanism of oxygen electroreduction at polypyrrole electrodes modified by cobalt phthalocyanine (Coutanceau et al.) 389
Potentiostatic
Electrochemical behaviour of a Pb electrode under galvanostatic and potentiostatic conditions in hot alkaline solution (Veluchamy et al.) 253
Propylene carbonate
Electrochemical study of iridium oxide layers in anhydrous propylene carbonate by cyclic voltammetry and "mirage effect" analysis (Petit, Plichon) 165
Protons
Role of protons on the electrochemical polymerization of pyrrole from acetonitrile solutions (Otero, Rodríguez) 513
Pt(111)
Note on the hydrogen adsorption–desorption voltammogram on Pt(111) in sulfuric acid solution (Nishihara, Nozoye) 527
Pyrimidine
Adsorption of pyrimidine at the mercury|aqueous solution interface (Rueda et al.) 467
Pyrrole
Role of protons on the electrochemical polymerization of pyrrole from acetonitrile solutions (Otero, Rodríguez) 513
Quartz crystal microbalance
Studies of the formation and redox transformation of poly(*o*-phenylenediamine) films using a quartz crystal microbalance (Martinusz et al.) 437
Quartz crystal resonator
Analysis of electrical equivalent circuit of quartz crystal resonator loaded with viscous conductive liquids (Shana et al.) 21

Raman spectroscopy
Effect of axial ligands on the spectroelectrochemical properties of zinc phthalocyanine films. In situ Raman and electroreflection spectra (Palys et al.) 89
Reaction–diffusion systems
Use of dynamically adaptive grid techniques for the solution of electrochemical kinetic equations. Part 4: The adaptive moving-grid solution of one-dimensional fast homogeneous reaction–diffusion problems with extremely thin reaction zones away from the electrodes (Bieniasz) 71
Redox
Direct survey of redox active compounds in sesame oil by cyclic voltammetry—studies on sesaminol, sesamol and hydroxyhydroquinone in nujol (Shiragami et al.) 315
Redox electron hopping
Kinetic Ising model for redox hopping of electrons and Saveant's equation (Bosco) 509
Redox transformation
Studies of the formation and redox transformation of poly(*o*-phenylenediamine) films using a quartz crystal microbalance (Martinusz et al.) 437
Reduction
Electrocatalytic reduction of hydrogen peroxide by iron–adenosine nucleotide complexes (Zhao et al.) 501
Reduction mechanism
The reduction mechanism of aromatic nitro compounds in aqueous medium. Part V. The reduction of nitrosobenzene between pH 0.4 and 13 (Laviron et al.) 427
Re-oxidation peaks
Electrochemistry of C_{60} films in the presence of bis(terpyridine)cobalt complex (Oyama et al.) 523
Rhodium
In-situ FTIR study of the electrocatalytic oxidation of ethanol at iridium and rhodium electrodes (De Tacconi et al.) 329
Ring–disc electrodes
The cathodic reduction of oxygen on uranium dioxide in dilute alkaline aqueous solution (Hocking et al.) 339
Ruthenium
Study of the electrocatalytic influence of Pt/Ru and Ru on the oxidation of residues of small organic molecules (Krausa, Vielstich) 307

Saveant's equation
Kinetic Ising model for redox hopping of electrons and Saveant's equation (Bosco) 509
Scanning Electrochemical Microscope
Scanning electrochemical microscope (SECM) study of the relationship between proton concentration and electronic charge as a function of ionic strength during the oxidation of polyaniline (Troise Frank, Denuault) 399
Scanning tunneling microscope
High resolution imaging of native hemoglobin by scanning tunneling microscopy (Zhang et al.) 535
Scanning tunneling microscopy
Structures of copper and halides on Pt(111), Pt(100) and Au(111)

electrode surfaces studied by in-situ scanning tunneling microscopy (Matsumoto et al.) 223
Sesame oil
Direct survey of redox active compounds in sesame oil by cyclic voltammetry—studies on sesaminol, sesamol and hydroxyhydroquinone in nujol (Shiragami et al.) 315
Silica-coated carbon fiber
Fabrication of silica-coated carbon fiber ultramicroelectrodes by chemical vapor deposition (Zhao et al.) 505
Small organic molecules
Study of the electrocatalytic influence of Pt/Ru and Ru on the oxidation of residues of small organic molecules (Krausa, Vielstich) 307
Solid polymer electrolyte
Indicator and reference platinum|solid polymer electrolyte electrodes for a simple solid-state amperometric hydrogen sensor (Opekar et al.) 301
Steady state
The current near the edge of a microelectrode for steady state EC′ reactions (Tutty) 519
Structural dynamics
Surface-enhanced Raman spectroscopic studies on structural dynamics of coadsorption of thiourea and ClO_4^- at Ag electrodes (Tian et al.) 271
Surface-enhanced Raman spectroscopy
Surface-enhanced Raman spectroscopic studies on structural dynamics of coadsorption of thiourea and ClO_4^- at Ag electrodes (Tian et al.) 271
Surface structure
Potential-dependent structural changes of underpotentially deposited copper on an iodine-treated platinum surface determined in situ by surface EXAFS and its polarization dependence (Bommarito et al.) 135

Thin-layer resistance
Influence of the ohmic polarization effect on thin-layer spectroelectrochemistry (Chen et al.) 239
Thin-layer spectroelectrochemistry
Influence of the ohmic polarization effect on thin-layer spectroelectrochemistry (Chen et al.) 239
Thiophene
A renewable glucose sensor fabricated from microemulsion polymerization of thiophene in a flow cell with application in a high-performance liquid chromatography system (Chan et al.) 293
Thiourea
Surface-enhanced Raman spectroscopic studies on structural dynamics of coadsorption of thiourea and ClO_4^- at Ag electrodes (Tian et al.) 271
TiO_2 anatase thin layer
A kinetic approach of competitive photoelectrooxidation of HCOOH and H_2O on TiO_2 anatase thin layers via on-line mass detection (Bogdanoff, Alonso-Vante) 415
Titanium dioxide film
Separate monitoring of reaction products formed at oxidation and reduction sites of TiO_2 photocatalysts using a microelectrode (Sakai et al.) 199
Titanium passivation
Characterisation of titanium passivation films by in situ ac impedance measurements and XPS analysis (Fonseca et al.) 173
Two-dimensional condensation
Two-dimensional condensation of methylguanidinium nitrate at the mercury|water interface (Wandlowski et al.) 215

Ultramicroelectrodes
Fabrication of silica-coated carbon fiber ultramicroelectrodes by chemical vapor deposition (Zhao et al.) 505
Underpotential deposition
Potential-dependent structural changes of underpotentially deposited copper on an iodine-treated platinum surface determined in situ by surface EXAFS and its polarization dependence (Bommarito et al.) 135
Structures of copper and halides on Pt(111), Pt(100) and Au(111) electrode surfaces studied by in-situ scanning tunneling microscopy (Matsumoto et al.) 223
Uranium dioxide
The cathodic reduction of oxygen on uranium dioxide in dilute alkaline aqueous solution (Hocking et al.) 339

Viscous conductive fluids
Analysis of electrical equivalent circuit of quartz crystal resonator loaded with viscous conductive liquids (Shana et al.) 21
Voltammogram
Kinetic theory of phase transitions at electrode surfaces: the voltammogram (Blum et al.) 35

Water
Erythromycin transfer across the water|1,2-dichloroethane interface modified by a phospholipid monolayer (Yudi et al.) 151

X-ray diffraction
Electrochemical behaviour of a Pb electrode under galvanostatic and potentiostatic conditions in hot alkaline solution (Veluchamy et al.) 253
